MASKS: vs. The Evidence

CDC vs. The Evidence. This graphic shows all studies cited by the CDC in "The Science of Masking to Control COVID-19" (16 November 2020) and "Science Brief: Community Use of Cloth Masks to Control the Spread of SARS-CoV-2" (last updated 6 December 2021), along with more than 150 of the other relevant studies they left out. Underlined studies are particularly noteworthy either for content or strength.

Evidence Discouraging Compulsory Masking
